

EXPERT WITNESS & LITIGATION SUPPORT

How Can TES Help Your Organization?

We know the difference a seasoned EH&S expert can make in your most challenging cases. For over 40 years, our team has partnered with law firms nationwide, turning complex OSHA, RCRA, EPA, environmental, health, safety, and labor issues into clear, compelling arguments, whether behind the scenes or on the stand. With our team, you get more than just technical know-how: you get a confident, approachable partner who's as comfortable explaining nuanced regulations to a jury as we are supporting your team every step of the way. Let us help you turn technical complexity into courtroom success.

Service Lines

1. **Expert Testimony:** Leverage our credentialed experts for persuasive testimony in court and deposition, backed by decades of real-world experience across a broad spectrum of EH&S disciplines.
2. **Pre-Trial Consulting:** Receive strategic guidance and technical analysis during case preparation, including risk assessment, regulatory interpretation, and evidence review to strengthen your litigation strategy.
3. **Documentation Review & Data Analysis:** Our team conducts thorough reviews of technical documents and data, identifying critical issues and opportunities to support your legal arguments.
4. **Discovery Support:** We assist in gathering and interpreting technical evidence, ensuring your discovery process is robust and aligned with your litigation objectives.
5. **Court & Deposition Preparation:** TES experts prepare your team for courtroom success with mock testimony, deposition strategy, and clear explanations of complex EH&S concepts.
6. **Training for Legal Teams:** Equip your attorneys and staff with specialized EH&S training tailored to the demands of your cases, enhancing your firm's capacity to handle technical litigation.

Client Testimonial

// I recently engaged TES to provide expert witness support for a chemical plant client facing a workers' compensation claim alleging hearing loss caused by workplace noise. TES's expert delivered compelling, evidence-based testimony demonstrating that the claimant's routine duties as a control room operator did not expose him to hazardous noise levels. Their testimony was both technically rigorous and accessible, enabling the judge to clearly understand the facts. Based on this experience, I highly recommend TES for any matter requiring authoritative environmental, health, and safety expertise. //
