

TES RESTORATION SERVICES

post-Natural Disaster

TES's on-staff EH&S experts **SAVE YOU TIME AND MONEY AFTER A NATURAL DISASTER.**
Through our proven process, TES will mobilize its personnel to the location and perform moisture mapping.

TES's TRAINED PROFESSIONALS WILL

1 Identify the building materials which need to be removed, as well as those which can be safely dried-out.

2 Calculate and recommend the proper amount of drying equipment.

3 Identify any asbestos building materials.

4 Oversee the removal and / or drying-out process.

Typically, our firm works directly for public and private building owners, condominium associates, school systems, and insurance companies.

What Makes TES Different:

TES is an EH&S firm that has on-staff Certified Industrial Hygienists, accredited / licensed asbestos personnel, mold experts, along with other EH&S expertise.

TES also has the **INFRASTRUCTURE** to quickly staff-up personnel to assist in restoration efforts.

Case Study:

Following a recent hurricane in Louisiana, TES assisted the largest school system in Louisiana to safely and quickly return over 50,000+ students and faculty to 80+ schools. We accomplished this by quickly mobilizing, having the on-staff technical expertise, and effective communication to the client and the restoration companies.
